as all other Flexifinger[®] lifters
Infinitely adjustable

Pulse Crop Lifter

70060
70062

Operator can fine-tune forward lifting point
Adjustment possibilities shown at left
Reduces chance of shatter loss
Gentle on the crop
Gentle on the combine
Quick and easy to attach and detach

Heavy Duty Crop Lifter

70050
70052

Operator can fine-tune forward lifting point
Fingers are easy to replace in less than a minute
Gentle on the combine
Gentle on the crop
Quick and easy to attach and detach

HighCut Crop Lifter

70160
70162

Unique tapered profile
Can lift table higher to pick up low-lying crop,
leaving taller stubble to help trap snow
and prevent erosion from wind and water

32292

32290

Carriage Bolt Conversion Kit

One designed for MacDon headers
with nylon skid panels (like the FD70) 32290
The other for guards that receive a 7/16" carriage bolt 32292
Fit the Flexifinger[®] QD[®] nut and sit flush.

JD HydraFlex[™] Bracket

40090

For mounting lifters closer than every 12 inches
on the JD offset guard system when harvesting
lentil or dry edible bean crops

Lifting Pan

33080

Attaches to the back of the Flexifinger[®] crop lifter
Helps lift and spread plant material over the knife
Can reduce shatter loss in dry field conditions
Catches shelled seed that would otherwise be lost
